

A Guide to the TestReach Desktop App for IT Departments

What is the TestReach Desktop App?

The TestReach Desktop App is an application that can be downloaded to a desktop or laptop to enable a candidate to take an exam on TestReach.

When opened, the TestReach Desktop App launches the TestReach Online website and it acts and behaves in the same way as if you were accessing the TestReach Online application using a standard internet browser.

Why is the TestReach Desktop App Required?

The TestReach Desktop App is used for two purposes.

1. Remotely Invigilated Exam

A Remotely Invigilated Exam is an exam that the candidate takes while been monitored by our trained supervisors via their webcam, audio feed and screen share. The Desktop App facilitates these connections and ensures a smooth experience for the candidate.

2. Secure Online Exam

A Secure Online Exam is an exam that the candidate takes during which they are “locked-in” to the application from the time they launch the exam until the time they complete it. This prevents them from, for example, opening up a web browser and googling the answers while they take the exam.

What are the System Requirements?

The TestReach Desktop App will run on any PC running Windows 7+ or a Mac running OS 10.8+

It works most effectively when a computer has Intel Core i3 (or equivalent) and 4GB RAM. It is also advised that the candidate uses a screen size of at least 13” and a resolution of 1024 x 768.

Are there any Security Concerns?

The TestReach Desktop App is very robust, safe to run and has been rolled out across the UK and Ireland in local government, emergency services, universities, pension administrators, financial corporations, etc. without any negative reports.

Once the exam is completed, the TestReach App can be closed by clicking the <Exit> button and has no notification service or any other configuration that runs while the App is not opened.

When opened it only connects to standard http and https websites through the standard Ports 80 and 443.

For those organisations requiring whitelisted IP addresses, the URL access points are as follows:

testreach.com

learnosity.com

zendesk.com

dof8gyq4yceq.cloudfront.net

54.163.229.157 via TCP/UDP 3478
